

BIKE TOUR OF THE LUCCHESE VILLAS

A few steps from the city, the Lucchese countryside opens up in all its elegance: a landscape dotted with splendid Renaissance Villas, each surrounded by enchanting gardens and steeped in history that reveals itself at every turn. Here, time seems to slow down, allowing you to savor the beauty and harmony of a bygone era that still feels vividly alive.

Our route follows the evocative Puccini cycling and walking path, dedicated to the celebrated Italian composer, which runs along the Serchio River and was awarded Italy's best cycling path in 2024.

It's a safe, scenic, and charming itinerary—perfect for letting yourself be carried away by the gentle rhythm of nature.

Continuing along quiet secondary roads, we reach the renowned Via delle Ville, an immersive route leading to the majestic Villa Reale.

Famous for having been, in the 19th century, the residence of Elisa Bonaparte, this estate captivates visitors with its extraordinary Baroque garden, a true architectural jewel. A guided visit is available upon request, for an even more complete and engaging experience.

An itinerary designed for those who wish to discover the most authentic and refined soul of the countryside around Lucca.
