

Begin your exploration with a walk through the vineyards, followed by a visit to the winery—an enchanting journey that allows you to immerse yourself in the slow, authentic rhythms of nature.

Among the rows of vines, children can observe the plants up close, learning how they change with the seasons while listening to engaging stories that explain the wine cycle in a simple and fun way—from the first bud to the bottle.

To make the experience even more immersive, children will have access to coloring sheets, educational games, and creative activities that guide them through each stage of wine production. They can draw vines, barrels, and grapes, discovering how these simple plants transform into such a precious product. Every corner of the winery becomes an adventure—from the large wooden barrels where the wine matures to the traditional tools once used by winemakers.

At the end of the tour, while parents enjoy a tasting of selected wines from the winery, children will also have their own sensory experience with a special tasting of natural fruit juices. This fun and stimulating moment allows them to sample different juice varieties while learning to recognize the delicate aromas and genuine flavors of freshly harvested fruit.

This experience is designed to offer the whole family a unique opportunity to spend quality time together, exploring and discovering side by side.

---
